DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. These claims are replete with indefiniteness problems. Below are examples only such that all of the claims should be reviewed for similar problems. In claims 1,14,15, it is not clear what structure is being positively claimed. In claims 17 and 18, the 'for example' phrase is indefinite as it is not clear what is being positively claimed. Claims 4,5,6,7 have numerous antecedent basis problems because it appears that claim 4 should depend on claim 3, not claim 2 e.g. claim 4, line 1 'the blades'.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8,11,12 are rejected under 35 U.S.C. 102(b) as being anticipated by the German '913 patent. Note in particular figure 11 which shows reciprocating jaws with teeth.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9,10,13-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over the German '913 patent. The limitations of these claims would have been obvious design choices only once the basic apparatus was known, especially since they solve no stated problems. For example, the use of a series of crushers to form the desired product size is well known in the art and of no patentable merit.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
